

REMARKS

In response to the Notice to File Corrected Papers, Applicants have eliminated former Figures 1(a) and 1(b), which depict a Coomassie stained gel (a) and an activity stained gel (b) of the lipase of the present invention, since currently renumbered Table 1 and Figure 1 summarize the data depicted by the gels. Consequently, Applicants have directed the cancellation of Figures 1(a) and 1(b), and directed the renumbering of the remaining figures. Applicants have further cancelled Figure 2 in favor of its insertion as Table 1 in the Specification. The original tables have been renumbered to reflect this amendment.

Applicants have made an earnest effort to place their application in the proper form for examination. Early and favorable action in the case is respectfully requested.

Respectfully submitted,

By
